

**TROY.NY**

# **Comprehensive Recycling Analysis Report**

**2022**

As in the prior reporting years, this Comprehensive Recycling Analysis (CRA) report (as required by 6 NYCRR 360.11) (d) will serve as an overview of the City of Troy initiatives (and their respective results) in the areas of resource management, recycling, diversion, community engagement, and solid waste handling. This report is for the calendar year of 2022. It is our continued intention to ensure that this information is shared in an inclusive and accessible manner, being mindful of the variety of learning and comprehension styles of reviewers and residents alike.

It is the City's plan to annually begin this report by recognizing the importance of land acknowledgement, starting with gratitude for this 11-mile-long City, located along the Eastern side of the mighty Hudson River. The aim is to honor the tapestry of life that has been woven along this majestic river, near roosting spots of eagles and their eaglets each year. Long before this became Troy, this area was known as the Cahohatatea by the indigenous Haudenosaunee People. Reiterating from the 2021 report, The Great Law of the Haudenosaunee (Iroquois) Nation, stating that the impact of decisions must be considered seven generations into the future. It is with this in mind that the City of Troy tackles the complicated issues surrounding solid waste, recycling, and resource management.

**Figure 1:** the Haudenosaunee Great Law.

This document is meant to be an interactive and “living” document for the use of the community and City, not merely to fulfill reporting requirements for New York State. It will continue to be a roadmap by which the City's decisions are to be made, as well as an opportunity for the City to gauge the effectiveness of our objectives and intentions. The updated timeline, reflecting the accomplishments for 2022 associated with these objectives is included in City's submission (Annex 1).

The City of Troy aspires to be a leader (or early adopter) in the resource management industry, while collaborating with others across the county, state and nation. This report will summarize how the City worked toward these goals in 2022 and plans to continue to do so in 2023 and beyond. The City of Troy recognizes that it is both a privilege and duty to care for this corner of the planet as each one of us is a part of an irreplaceable planet with her awesome regenerative cycles.

As noted in prior CRA reports, the primary areas of focus are aligned with the parameters delineated by the following seven objectives:

1. Establish a recycling center
2. Provide guidance for food diversion and a facility for mulch/compost
3. Develop a plan and a re-use center
4. Create clear waste collection procedures and increase collection participation
5. Education and outreach
6. Increase accurate data collection
7. Create a deconstruction permit and provide deconstruction education

#### **Objective 1: Establish a recycling center:**

At the end of 2022, the City ironed out final details to complete the purchase of the “Alamo” (Troy Resource Management Facility/TRMF) from Troy Local Development Corporation (TLDC). Since the transaction was not officially executed, it is anticipated to be completed in early 2023. As continued improvements are made to the facility, it will be a viable site for more community engagement opportunities. Additionally, in the coming years, the City will resurface the entire facility and create a physical structure (workspace) at the TRMF for ease- of-use.

#### **Objective 2: Provide guidance for diversion/gleaning for consumable foods and operate a mulch and/or compost facility:**

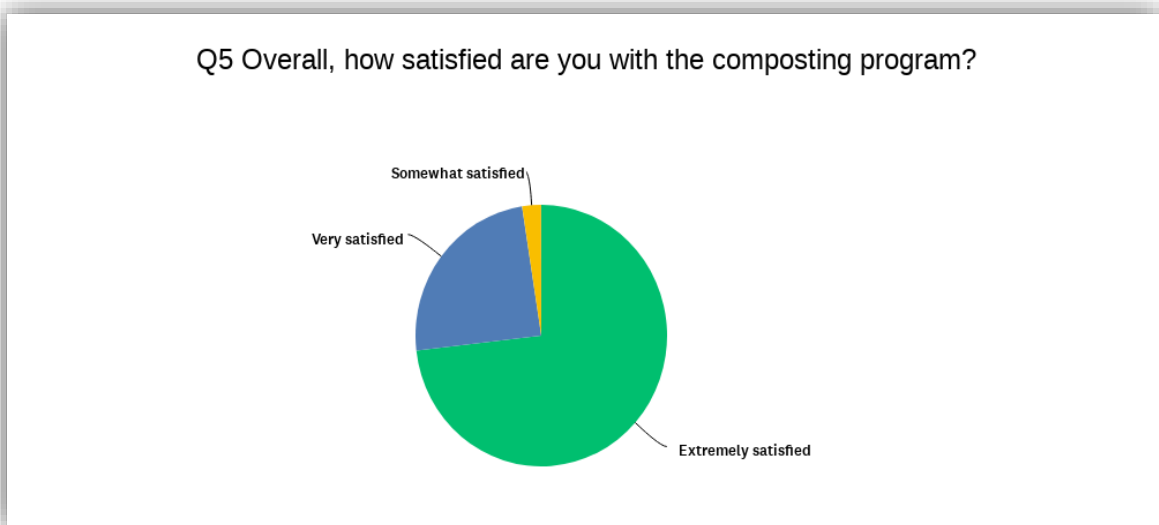

In 2021, the United States Department of Agriculture (USDA) and National Resources Conservation Service (NRCS) awarded the City of Troy funding toward a community compost and food waste reduction pilot program. This allowed the City to implement regular increases in food scrap collection. This initiative is in collaboration with FoodScraps360, a local hauler, to collect and transport the food scraps to the Town of Bethlehem’s Composting Facility. This program now includes a total of 250 participants. The USDA grant covers 75% of the program’s expenses and the City of Troy covers the remaining 25%. The curbside model was chosen in order to best accommodate Troy’s urban population, where many residents have limited space within their homes, and no access to a backyard for backyard composting. The curbside model generated over 20 tons of food scraps in 2022.

**Figure 2:** distribution of households participating in the curbside composting program in 2022.

**Figure 3:** the monthly totals (measured in pounds) of food scraps diverted in the curbside composting program in 2022.

**Figure 4:** the results from a 2022 survey in the composting program. Nearly all participating households are satisfied.

As well, the weekly food scrap drop-off (Tuesdays and Thursdays, from 9am to 1pm) at the Alamo diverted over 2,300 pounds of food scraps. This additional service was established for the convenience of residents unable to participate in the composting pilot.

Access to backyard-composting also achieved an increase by once again hosting a twice-annual (online) composter and rain-barrel sale. Wood chips and pallets were available for pickup throughout the year at the Alamo.

In addition, a new collaboration with a local expert composter and the Troy Public Library Lansingburgh Branch was implemented. A series of four composting workshops in 2022 were hosted at the Troy Public Library's Lansingburgh branch. Two of these were directed toward school-age children and younger, and two designed for adults. There will be two additional workshops in 2023.

During spring of 2022, another notable change to the City's materials-handling processes included having City departments managing trunks, stumps, branches and brush. Previously, these items were hauled by a vendor and were to be processed outside of the City. There were significant costs to this practice and no benefit to the City. As a solution to this, the City consulted with a local arborist, who recommended utilizing hügelkultur, a centuries-old way to encourage expedited decomposition of these materials. Now, the materials are brought to the southern end of the "Hale Street Lot" to naturally break down. With this simple change in process, the materials will build soil, prevent erosion, and create cost-savings for the City.

**Figure 5:** an aerial view of the Hale Street lot in Troy, New York.

### **Objective 3: Develop and plan a reuse center:**

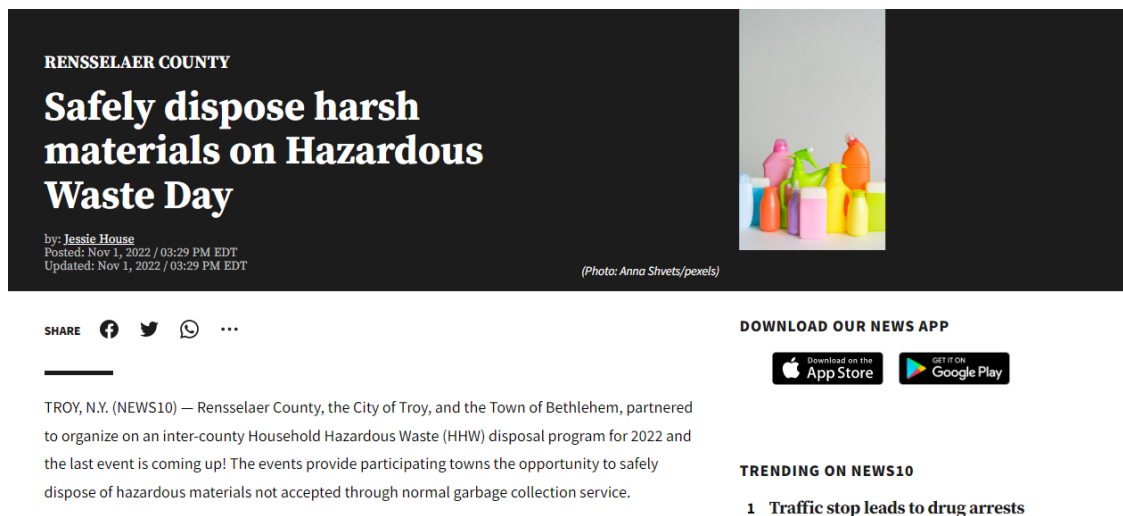

Reuse in Troy is currently managed by the various non-profits, thrift stores, community organizations and affiliated agencies throughout the City. This includes but is not limited to five secondhand clothing stores, a free textile donation store, and a furniture recovery/donation agency.

Over time, it is the hope of the City of Troy to provide opportunities for a non-profit or privately owned entity to open and run a reuse center and (separately) a Deconstruction Materials Warehouse. This objective will be explored in greater detail over the coming years as legislation and ordinances for deconstruction are developed.

#### **Objective 4: Set clear waste collection procedures and increase collection participation:**

Throughout 2022, the City continually increased the number of available residential recycling bins. Resident preference leans toward the larger (22gal) bins. The goal (as the City is able) is to purchase larger recycling barrels with lids and wheels.

The City collaborated with Rensselaer County and the Town of Bethlehem in 2022 to execute six hazardous waste collection events (Annex 3A and 3B). This allowed residents in municipalities throughout the county (who have not had the opportunity before) to participate. Smaller municipalities, including Schodack, Brunswick, and Poestenkill were all able to offer this service after difficulties executing events on their own due to expenses

**Figure 6:** a local news station’s story on the 2022 inter-municipal household hazardous waste events. involved in hosting.

During the 2022 calendar year, the City posted a request for proposals (RFP) for HHW (Household Hazardous Waste) vendors to respond to for a three-year contracting period. This updated RFP provided an opportunity for the City to modify the terms of the prior contract. The City added terminology requiring the vendor to allow material streams (within their scope of work) to be diverted from being serviced by the vendor if it was

determined to be more environmentally or fiscally beneficial to do so at no cost. The prior contract's piggyback clause for municipalities, counties and districts to utilize the RFP was also included.

A small-scale end-of-year cleanout for Rensselaer Polytechnic Institute (RPI) students was reintroduced in 2022. This program achieved limited success with bulky item diversion. However, four permanently sited textile bins (on-campus) diverted over 2,500 pounds between May and December of 2022. The City will be collaborating with RPI again in 2023 with a revitalized communications strategy to assist in diversion.

For the City's annual string lights recycling program (from mid-November to mid-January), the City successfully partnered with several local Girl Scouts troops (1165, 1435, and 1303). Improvements to the program included assigning a Girl Scout per barrel, a distribution list, and performance records for each location. Based on the results, the troops recommended replacing one of the less successful locations with an alternate site at the Rensselaer County Department of Motor Vehicles. The troops diverted over 760 pounds of string lights, and received over \$300 dollars in rebate funding from a local scrap metal recycling company. The proceeds were donated to the Troy High School food pantry. The Girl Scout Troop leaders hope to see the program expand to other troops throughout the area to increase accessibility and diversion.

**Figure 7:** a Girl Scout and police officer pose next to a decorated string lights recycling barrel.

#### **Objective 5: Education and outreach:**

The City's Recycling Specialist (hired in 2021) focuses on three primary areas: increased outreach and engagement initiatives; development of a cohesive plan for visibility and engagement; and creation of branding for diversion and recycling programs. Examples of successfully executed engagement materials include four specialty brochures, as shown in figure 8. As well, the Recycling Specialist managed the composting pilot, and continued

expansion of the City's communications outreach (via social media, "Recycling Matters" newsletter and "From the Ground Up" newsletter).

The ongoing efforts of the Coordinator and Specialist directly impact stakeholders' engagement, helping to shift resident mindsets from "cradle-to-grave" to "cradle-to-cradle" and resource recovery. The Coordinator and Specialist participated in community meetings throughout the year, allowing the opportunity to speak directly with residents, distribute recycling bins, and share information.

**Figure 8:** the front covers of the four City branded brochures: food scrap drop-off, textiles, household hazardous waste, and recycling/trash.

**Figure 9:** the first reusable bag design, was available in ten different colors.

During 2022, the City created four designs for reusable bags, and ordered almost 9,000 re-total from paper-bag rebate funds. These bags were offered to local pantries, non-profits, neighborhood groups and to residents (in-person, at Troy City Hall).

The Recycling Coordinator and Specialist participated in a statewide NYSAR<sup>3</sup> (NYS Association of Reduction, Reuse and Recycling) Conference, pre-conference training day focused on diversity, equity, and inclusion. Both individuals are highly invested in the newly developed "MEDI+" Committee (membership, equity, diversity, inclusion, and young

professionals) and sit as chairs on these statewide committees. The Recycling Specialist has also revived the “Young Professionals” subcommittee with three other co-chairs.

The City coordinated the annual Earth Week city-wide cleanup, resulting in over 25 events hosted by residents and neighborhood groups. Cleanup organizers were invited to pick up the following education and outreach items to distribute at their event:

- Recycling bin stickers
- Food waste prevention magnets
- Deterra pharmaceutical disposal bags
- Clear trash bags
- Brown paper yard bags

Based on the achievements of the prior school year’s partnership with Troy School 2 (also known as Public School 2, or “PS2”), the City continued collaborating with an after-school STEM program, comprised of fourth and fifth grade students. The program was supported by a Rubin’s Fellow (private grant program) professor from Sage College, who co-developed lesson plans for these sessions with the City. The primary goal of this series was to share an understanding of and a responsibility for diverting textiles from the waste stream with students. The outcome at the end of the school year (June 2022) was the successful placement of a textile bin on school grounds. The STEAM students will continue monitoring the weight of textiles diverted and funds generated. 2022’s weight total for the school was over 3,000 pounds, which is an amazing outcome for the first six months of the program!

**Figure 10:** the textile reuse and recycling program magnet design, describing what can and cannot go into the bins.

The City was awarded a small grant by Syracuse University’s Center for Sustainable Community Solutions (CSCS) to create textile diversion magnets that will be used in the 2023/2024 calendar year to promote the program.

#### **Objective 6: Increase accurate data collection:**

During the 2022 calendar year, the City continued to streamline the documentation and processing of waste-hauling permits, including more comprehensive language regarding exemptions. Improvements to the program include permit stickers for both permitted

vehicles and exempted; contrasting sticker colors for ease of differentiation; increased notification of information requested, and edited, concise language. The plan for 2023 will include interagency cooperation (City of Troy Office of General Services, Troy Police Department and NYS Department of Transportation) to enforce hauler registrations. The additional reconciliation of permits received, outstanding and in-progress, has allowed the City to more proactively control the flow of waste-haulers utilizing the City's streets, roads and facilities.

As well, the development of a year-to-year comparison (Annex 2A) provides an ongoing opportunity for the City to see diversion program progress and challenges chronologically. An annual overview of solid waste disposal volume and pricing (Annex 2B) continues to further support the increased aggregation of data. All solid waste is landfilled and not sent to a waste-to-energy facility.

### **Objective 7: Create a deconstruction permit and education/outreach plan:**

Throughout 2022, the Recycling Coordinator compiled a 'best practices' collection examples of:

- deconstruction permits,
- on-site checklists
- white papers
- research studies
- deconstruction pilots

These resources were used to inform recommendations for statewide legislative actions and standard procedures. In early 2022, the City committed to hosting a Deconstruction-related event while participating in a CROWD-facilitated zoom call. The City hosted its first statewide Deconstruction Summit in December. This event included 16 counties and 5 colleges from throughout NYS.

### **Looking ahead:**

**AGENDA**

**9:00 AM - 10:00 AM**  
**REGISTRATION CHECK-IN**  
*Location: Bush Memorial Center*

**10:00 AM - 10:25 AM**  
**WELCOMING REMARKS**  
Speakers:  
• Patrick Madden, Mayor, City of Troy, NY  
• Barb Nelson, Executive Director, TAP Inc  
• Christopher Ames, President, Russell Sage College  
• Jake Ashby, NYS Assemblymember  
• Dr. Anna Kelles, NYS Assemblymember  
• David Bennink, Director, Building Deconstruction Institute

**10:25 AM - 10:40 AM**  
**SUMMIT OVERVIEW**

**10:40 AM - 10:55 AM**  
**BREAK WITH LIGHT REFRESHMENTS**  
Including stretching with Cody Bloomfield.

**10:55 AM - 12:30 PM**  
**SMALL WORK GROUPS: PART I**  
Small work groups will begin discussing topics provided to determine highest priorities for statewide legislation, and determine which are best handled locally.

**12:30 PM - 1:15 PM**  
**LUNCH**

As a City, Troy has been part of both implicit and explicit discussions concerning best-practices to remain nimble, responsive, and agile in this ever-changing environment. Regardless of the challenges or complications, difficulties or disruptions, the City is committed to effective resource management, encouraging biodiversity conservation and mitigating climate change to the best of its ability.

**Figure 11:** the agenda from the Deconstruction Summit.

The City of Troy, NY values its relationship with the NYSDEC and the residents of this municipality and looks forward to collaborating with both cohorts in continuing to work toward a cleaner, greener Troy.

**Annex 1: the Comprehensive Recycling Analysis timeline, with  
progress up to end of 2022 (continued on next page).**

City of Troy Solid Waste Management Plan (2019-2028) - 10 Year Implementation Schedule						
Objectives and associated tasks	Responsible Party	Projected year	2019	2020	2021	2022
<b>ReUse Programs</b>						
<u>ReUse Center</u>						
Household Donation (private/non-profit) Options		2026				Ongoing
Research Center/Partnership Plan	< 6.3m pounds diverted 10y	2024				Report
Plan Update	< \$5M generated in 10y	2025				Report
Affiliate with existing partners and agencies		2025				In process
<b>Recycling Programs</b>						
<u>Monitor National Recycling Situation</u>						Ongoing
Recycling Contract		2021			renewed	
Annual Recycling Update		annually	Update	Update	Update	Update
<u>Textile Recycling</u>		2021				
partner with K-12 schools to develop student liaisons		2021			In progress	Pilot with PS2
create pilot program w/colleges and schools for textile recycling expansion		2021			In progress	RPI
<u>Household Hazardous Waste</u>						
develop comprehensive RFP for HHW bidding process		2019	complete	2022 for contract 2023-2025		
set up RFP review board		2019	complete			
Increase Annual Events		2019	complete		collaborated intermunicipally	continued collaboration
2 events per year		2019	complete			
4 events per year		2021			inter-municipal partnership	
<u>Recycling/drop-off Center</u>						
PILOT - Open Alamo April - Oct.		2021		Report	open Thursdays	open Tues/Thurs
Update on Recycling Center		2024		Report		
Alamo Site Buy or Lease		2023			Process started	all documents issued
Open Drop Center (Year Round)		2021			Completed	
<b>Education &amp; Outreach</b>						
<u>Develop systems/strategies</u>						
prioritize tasks and objectives		2020				Ongoing
Recycling Coordinator		2018				Ongoing
"Recycling Matters" (monthly online newsletter)		2019				Ongoing
Update forms (bulk pickup, annual solid waste fee) to reflect current info		2019			Completed	
Increased Event Offerings (other types of diversion events)		2023			pumpkin smash	
partner with schools/colleges to brainstorm opportunities		2022			Ongoing	
Improved visibility of shared information		2021				Ongoing
All portions of DPW pages of city website updated/linked to ReCollect		2021			ReCollect completed	In process
Website maps and links also cross-linked to ReCollect		2021			completed	improvements and upgrade
Develop phone-tree for DPW/DGS to reach correct personnel		2020	complete			Update
Partner with RPI, Sage and New Visions to create curricula and databases		2021	in process	completed		added curricula
Utilize Rubin Grant to develop community outreach toolkit		2020-2021	complete			received additional funds
Outreach to public, private and charter schools to provide access to materials		2024				In process
Do waste audit for presentation to City Council		2021			Started	
Do community-based waste audits		2021			Started	In process
Design and order bin stickers for recycling bins		2020	complete			
Host "online store" for composter and rain-barrel orders		2020				
Design and order "food scrap" fridge magnets		2020	complete			complete
Create social media account(s)		2021			complete	
Design and order reusable bags (5-cent bag tax revenues)		2020		complete	complete	Quarterly designs/orders
<b>Hauler Licensing</b>						
<u>Research other county/municipal permit applications</u>		2019	Complete			
Hauler Permit developed and legislation approved		2020		complete		
Notification to Haulers		2020		complete	Standard procedure created	
Permit stickers designed and ordered		2020		complete	June, annually	
Permit requests from haulers		2020-2021		complete		
Second request permit application completion		2020-2021				September, annually
Revise permit to reflect fee-uniformity		2021		complete		
Notify haulers of approval/send permit sticker		2021		complete		As applications are approved
Quarterly reports on hauler statuses (in violation or no)		N/A				Ongoing
Annual Notice/Data Requests		annually				Ongoing
<b>Organics Recovery</b>						
<u>Food Waste/ Source Separated Organics</u>						
Pilot Compost program with other municipalities/private hauler		2021				Ongoing
Stumps re-located from Alamo to alternate site		2021				complete
Fully implement compost program (citywide)		2023/2024				ad
Partner with food-gleaning agencies to divert edible food		2026				
Partner with private or non-profit entity to develop community food-service program		2027				
<u>Yard Waste</u>						
Create separate bays for storage at Alamo		2020		complete		
Develop regular schedule for maintenance of areas		2021				
Separate out leaves (no charge to city from vendor to haul out)		2020		complete		
Screen Material		2019				Ongoing
Open Alamo for Private Yard Waste drop-off and mulch pickup		2021			Pilot	
<u>Registered Mulch/Re-use/Transfer Facility</u>						
Permits for all functions of Alamo from DEC		2021				
Develop Regional Food Waste Group		2023	Research		Regional Group	
<b>Incentive Based Pricing</b>						
<u>Solid Waste Management Fees</u>						Ongoing
Determine area for "fair share" business/multi-unit program		2019	Research	complete		
Set pricing for fair-share and send out notification/information		2019		complete		
Hold community meetings to inform property-owners for Q and A		2019-2020		complete		
Roll out fair-share program		2020		complete		
<u>Hybrid PAYT</u>						
Research types and applicability		2019-2020	research	research		
Implement Hybrid PAYT		non-viable				VETOED BY CITY COUNCIL

	Evaluation		N/A				
	<u>Bulk Pricing</u>						
	Implement Clear Bulk Waste Pricing	2018	complete				
	Furniture Donation	2024					Ongoing
	Report	when in progress		Report			
<b>Waste Disposal</b>							
	<u>Trash Disposal</u>						
	<u>New Equipment Investment</u>	ongoing					Ongoing
	Order SSR signs for trucks to properly identify when MSW trucks re-deployed	2021					
	Provide SSR receptacles with lids for residents	TBD					
	Provide residents with larger SSR bins (16g and 22g available)	2020					
	<u>Bulk Disposal</u>						
	<u>New Equipment Investment</u>	ongoing					Ongoing
	Integrate into specific pickup day (route-based) structure	2021					
	Access to information (pickup maps, etc)	2021	Complete				
<b>Enforcement Programs</b>							
	<u>Litter Patrol Officer</u>	2019	complete				
	Add 2nd LPO	2019	complete			add 3rd LPO	
	Provide in-house work-space for LPO's at City Hall	2020		complete			
	<u>Sanitation Workers</u>						
	Utilize contamination stickers and hang-tags for doors	2019					
	<u>Account Clerk</u>						
	Provide billing and invoicing structure for violations	2019		complete			added 2nd account clerk
	<u>Address Visibility</u>						
	Research Cost of Implementation	2025					
	Implement across City	2026					
	<u>Solid Waste Advisory Board (after 2019-2028 plan approval)</u>	2019-2020	Complete				
	Assist in New Plan (2029 Publication)	2027-2028		complete			
	Assist Recycling Coordinator with annual report to Mayor	annually					
<b>Data Collection &amp; Evaluation</b>							
	<u>Collect Missing Data</u>						
	Update Plan with New Data	2021					Ongoing (include in first year a n
	Decide on and commit to platform as clearinghouse for data	2020		complete			
	Create accurate databases of various informational resources	2021			complete		
	GIS mapping (routes, violations, recycling bins, etc.)	2021			complete		
	Create and maintain monthly MSW and SSR data from County Waste	ongoing					Ongoing
	Develop large-scale generator letter	2020-2021		complete			
	Deploy generator letter with response requirement	2021			complete		
	Track quantities of materials diverted from waste stream	ongoing					Ongoing
	<u>Regional Approach</u>						
	Research Possible Regional Options	2024					
	Join or Create a Planning Unit	2025					
<b>Flow Control</b>

## Annex 2A:

### DIVERTED MATERIALS SUMMARY (year-to-year)

Commodity stream	Year	Quantity diverted	Year	Quantity diverted	Year	Quantity diverted	Year	Quantity diverted	Year	Quantity diverted	Year	Quantity diverted
Single-stream recycling	2019	1,174 T	2020	1,283 T	2021	1,325.65 T	2022	1,193.58 T	2023		2024	
Scrap metals		34.9 T		25.75 T		6.75 T		9.4 T				
Textiles		Unkn.		5.03 T		19 T		21.3 T				
Yard materials		1,267 T		273 T		1,102.5 T		326 T				
Brush, trunks, stumps		Incl. abv.		415.2 T		244 T		324 T				
Food scrap		N/A		N/A		.32 T		22 T				
Tires		43 T		22.5 T		28 T		20.5 T				
Biosolids		50 T		4,590 T		2,680 T		1,396 T				
Electronic waste		9 T		8.5 T		32.4 T		29.2 T				
Asphalt/milling		100 T		N/A		18,962.35 T		97,206.6 T				
Sweeps		324.3 T		N/A		237.88 T		102.4 T				
<b>TOTAL ANNUAL DIVERSION</b>		<b>3,002.2 T</b>		<b>6,609.98 T</b>		<b>24,638.85 T</b>		<b>100,651 T</b>				
<b>AGGREGATED DIVERSION</b>												

\*Although some items have processing fees associated, there are significant avoided costs with each of these commodity streams being diverted

Additional information:

- 1) Textile total includes new bins placed @ PS2 and RPI for which they collect [revenue](#)
- 2) Food scrap includes both residential pickup and materials dropped off @ bins @ [Alamo](#)
- 3) E-waste includes bulk pickup as well as electronics recycling day [collections](#)
- 4) Asphalt was milled by contractors, not by the [City](#)
- 5) Brush, stumps and trunks now stay within City limits to prevent erosion and build [soil](#)

## Annex 2B: Solid Waste Disposal

Year/Q	Month	Total MSW \$	8160 Residential	8170 Municipal	8175 Bulk	8175 roll-offs \$	Roll-off weights	MSW WEIGHT (T)
