APPENDIX I: PUBLIC SURVEY

1.0 Introduction

1.1 Overview

The purpose of this ADA Self-Analysis and Transition Plan is to ensure that the City of Troy pedestrian infrastructure in the public right-of-way is accessible for everyone, including people with disabilities. Federal standards for pedestrian facilities in the public right of way were proposed in 2011 were finalized and became effective in September 2023 and will be enforceable once adopted by the US Departments of Justice and Transportation. The City has made a significant and long-term commitment to improving the accessibility of pedestrian facilities in the public-right-of-way.

The City has identified and evaluated all pedestrian infrastructure in the public right-of-way including curb ramps, sidewalks, crosswalks, pedestrian signals, and pedestrian accessible transit stops.

This document was funded by the Capital Region Transportation Council (CRTC), in part through a grant from the Federal Highway Administration, U.S. Department of Transportation. It is limited to pedestrian transportation facilities in the public right of way as well as shared use paths with a transportation function, and does not include any other programs, services, or activities such as buildings, parks, playgrounds, recreational trails, websites, or meeting locations. The views and opinions expressed herein do not necessarily state or reflect those of the U. S. Department of Transportation.

1.2 Mandate – Americans with Disabilities Act

The federal legislation, known as the Americans with Disabilities Act (ADA), enacted on July 26, 1990, provides comprehensive civil rights protections to persons with disabilities in the areas of employment, state and local government services, and access to public accommodations, transportation, and telecommunications.

1.3 Transition Plan

Title II of the ADA specifically applies to “public entities” (state and local governments) and the programs, services, and activities they deliver. Title II regulations require that each public agency develop a Transition Plan (also referred to as “Plan”) to bring any non-compliant programs, services, and activities into compliance.

The Plan shall, at a minimum:

- Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
- Describe in detail the methods that will be used to make the facilities accessible;
- Specify the schedule for taking the steps necessary to achieve compliance with Title II and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period;
- Indicate the official responsible for implementation of the plan.

Transition plans provide a method for a public entity to schedule and implement ADA required improvements to existing facilities. Before a transition plan can be developed, an inventory of the existing facilities must be developed.

Because the ADA is a civil rights law, the federal enforcement entity for the ADA is the Civil Rights Division of the US Department of Justice (DOJ). The DOJ enforces ADA through various means: establishing standards for meeting the requirements of the ADA; coordinating enforcement activities of other federal

agencies; and, as necessary, taking legal action to require compliance with ADA by state and local governments.

The Access Board is a federal agency that promotes equality for people with disabilities through leadership in accessible design and the development of accessibility guidelines and standards. As a coordinating body, the scope of their recommendations and guidance includes but is not limited to public rights of way, public buildings, and medical facilities.

1.4 PROWAG

The United State Access Board established proposed guidelines to assist in the evaluation of accessibility of public facilities, the “Proposed Guidelines for Pedestrian Facilities in the Public Right-of-Way” as well as the “Supplemental Notice on Shared Use Paths”. Not yet formally adopted by the US Departments of Justice or Transportation, the Public Rights of Way Accessibility Guidelines (PROWAG) were adopted and became effective in September 2023. They were utilized in evaluating pedestrian facilities in the preparation of this plan.

The PROWAG provide design guidance for a wide variety of facilities in the public right of way, including curb ramps, sidewalks, street crossings, transit stops, and signage. Many of the guidelines are particularly sensitive to people who use a wheelchair or have low vision, though the guidance is intended to eliminate all access barriers for people who have a disability.

1.5 Public ROW and Jurisdiction

Defining jurisdictional boundaries or ownership of facilities within the public ROW and identifying the responsible entity is central to the successful

implementation of the ADA Transition Plan. Three jurisdictional entities have been identified in preparing this plan including the City of Troy, Rensselaer County, and the State of New York.

Although three jurisdictional entities possess rights-of-way within the City of Troy, the legal responsibility of maintaining and improving non-conforming or deficient facilities does not necessarily fall to the owner of the right-of-way.

According to New York State Highway Law (Chapter 25, Article 3, §46), sidewalks may be installed by the State of New York. However, notwithstanding an agreement to the contrary, once installed, the City of Troy is obligated to maintain those sidewalks. Similarly, the City must maintain sidewalks along county roadways (Chapter 25, Article 6, § 131) unless there is an agreement to the contrary. The City of Troy currently transfers the responsibility of construction and maintenance of sidewalks to the property owner adjacent to the sidewalk per the City's General Legislation § 251-4. Under this provision, the City may notice a deficient condition and require action by the landowner.

The following table (Table 1) identifies the entity responsible for the maintenance and improvement of pedestrian facilities within the City. This table is representative only of jurisdictional entities at the City, County, or State level, and does not reflect the City policy of landowner responsibility outlined above.

**TABLE 1 RESPONSIBLE ENTITY FOR MAINTENANCE OF
PEDESTRIAN FACILITIES**

FACILITY TYPE	City of Troy Right of Way	Rensselaer County Right of Way	New York State Right of Way
SIDEWALKS	City of Troy	City of Troy	City of Troy
CURB RAMPS	City of Troy	City of Troy	City of Troy
CROSSWALKS	City of Troy	Rensselaer County	New York State
PEDESTRIAN CROSSING SIGNALS	City of Troy	Rensselaer County	New York State

1.6 Installation of Conforming Facilities during Roadway Alteration Projects

In accordance with the Department of Justice(DOJ)/Department of Transportation (DOT) Joint Technical Assistance on the Title II of Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing (<https://www.ada.gov/doj-fhwa-ta.htm>) – when pedestrian walkways intersect a curb, and the adjacent roadway is being altered including by resurfacing, the entity facilitating the roadway alteration is also responsible for the provision of an accessible curb ramp. The same principle exists if an entity is undertaking a roadway alteration project that requires the removal of other pedestrian facilities, such as sidewalks. If the facility is removed, it must be reinstalled and conform to the most current accessibility standards. Guidance on the definition of a roadway alteration is provided in the DOJ document referenced above and include: “reconstruction, rehabilitation, resurfacing, widening, and projects of similar scale and effect.”

1.7 Identified Obstacles in the Public Right-of-Way

The City of Troy has conducted a detailed evaluation of obstacles within the City, County and State rights-of-way, the methodology and criteria outlined in Appendix A. Sidewalks were evaluated for continuity, missing panels, heaving panels, physical obstructions, and minimum width. Curb ramps, crosswalks, and pedestrian signals were evaluated against key PROWAG criteria. The results of the evaluation are presented in the following section(s).

2.0 Detailed Evaluation

2.1 Inventory

An inventory and assessment of all pedestrian facilities located in the City on local, county, and state roads was completed by consultants provided by the Capital Region Transportation Council.

Initially, a sidewalk inventory (including related pedestrian features and transit stops) was provided by the Transportation Council and this

information was updated based on a review of the most current aerial photography and Google Street View. This information was used as base map for additional data collection and condition assessment. New sidewalks may have been constructed during or shortly before the completion of this document. Over time, changes to the pedestrian infrastructure should be incorporated into the inventory and monitored for continued compliance.

Field data collection was accomplished on a mobile device (a Tablet, iPad, Trimble, or mobile phone) and the ESRI applications ArcGIS Field Maps and Survey 123. The consultant's staff were trained in the evaluation and scoring of pedestrian features for compliance and subsequently completed the inventory and collected photographs and other important site-specific information.

Pedestrian features evaluated included sidewalks, transit stops, and key intersection features including curb ramps, pedestrian signals, and crosswalks. Evaluation criteria focused on compliance with key elements adapted from the PROWAG. The evaluation methods are included in Appendix A.

To complete the detailed evaluation, an accessibility condition rating for each of the identified facilities was determined. The City of Troy used the following ratings and definitions to assess the condition of each sidewalk facility on local, county, and state rights-of-way.

TABLE 2 CHARACTERISTICS OF ACCESSIBILITY CONDITION FOR SIDEWALKS

	CHARACTERISTICS	EXAMPLE
1. FULLY ACCESSIBLE	<ul style="list-style-type: none"> Designed to Meet Current Standards 	<ul style="list-style-type: none"> Newly Installed Facility
2. MOSTLY ACCESSIBLE	<ul style="list-style-type: none"> Provides Access Not Fully Compliant 	<ul style="list-style-type: none"> Curb Ramps <i>Without</i> Detectable Warnings Limited Minor Defects
3. PARTIALLY ACCESSIBLE	<ul style="list-style-type: none"> Limited Accessibility 	<ul style="list-style-type: none"> Several Minor Defects
4. NOT ACCESSIBLE	<ul style="list-style-type: none"> Significant Discontinuity Inaccessible 	<ul style="list-style-type: none"> No Curb Ramps Steps Significant Heaving

Note: Additional information on evaluation criteria, including example imagery of sidewalk conditions, can be found in Appendix A.

To evaluate the accessibility of more complex multi-part features like curb ramps, crosswalks, and transit stops a rating matrix was used. Depending on the severity and number of deficiencies at any one of these features, they were assigned a pass/fail rating.

2.2 Sidewalk Accessibility Condition

The City of Troy has a total of 150.58 miles of sidewalks that have been assessed for compliance with PROWAG. Sidewalks are assessed for missing panels, heaving panels, obstructions, and panel sidewalk width. Sidewalks are rated at the segment level. Typically, one sidewalk segment equates to one city block unless external circumstances – such as a driveway for a significant commercial activity like a grocery store – causes a significant break in the sidewalk on that block. Approximately 16 percent of segments in the City are rated Fully Accessible, and about 36 percent of segments are rated not accessible, the most common rating. Approximately 19 percent of segments in the City are rated Partially Accessible. In total, approximately 62 percent of all segments have a rating that requires repair or improvement (Partially Accessible or Not Accessible).

It should be noted that because field evaluation ratings are conducted at the segment level, short segments are less likely to have conditions that would impact their rating while the opposite is true for long blocks. Knowing this, the City should use this evaluation as a tool to identify segments that have barriers that must be remedied and focus remediation efforts on specific barriers rather than entire block segments.

TABLE 3 BLOCK LEVEL SIDEWALK SCORE RESULTS

ACCESSIBILITY RATING	PERCENTAGE (%) OF TOTAL MILES	LENGTH (MILES)	NUMBER OF BLOCKS	PERCENTAGE (%) OF SEGMENTS
FULLY ACCESSIBLE	12.75%	19.20	480	15.96%
MOSTLY ACCESSIBLE	23.80%	35.84	754	25.08%
PARTIALLY ACCESSIBLE	20.89%	31.44	565	18.79%
NOT ACCESSIBLE	41.39%	62.32	1,072	35.65%
GRAND TOTAL	100%	150.58	3,007	100%

The most common condition that creates barriers to accessibility are obstructions and heaving panels, which were present on approximately 70 percent of all block segments assessed. The presence of heaving panels may not result in a Not Accessible or Partially Accessible rating depending on the severity and frequency of heaving. Sidewalk segments rated Mostly Accessible should be monitored to ensure these segments remain accessible and conditions do not worsen over time.

A detailed table depicting the City's inventory of sidewalks is included in Appendix D.

TABLE 4 BLOCK LEVEL SIDEWALK BARRIER CHARACTERISTICS

BARRIER CHARACTERISTIC	NUMBER OF BLOCKS WITH BARRIER	PERCENT (%) OF ALL BLOCKS
MISSING PANEL	1,036	34.45%
HEAVING PANEL	2,113	70.27%
OBSTRUCTION	2,167	72.07%
TOO NARROW	437	14.53%

2.3 Curb Ramp Accessibility and Condition

All intersections where sidewalks intersect roadways were observed for the presence of curb ramps, whether the curb ramp was flush with the roadway and whether a detectable warning strip (DWS) was present. 3,930 intersection access points were evaluated to assess their condition and accessibility.

Eighty-two point six (82.6) percent of the observed curb ramps have a condition that may impact their accessibility, the most frequent of which are related to detectable warning surfaces. Detectable warning strips (DWS) are used to indicate to the visually impaired that they have reached an intersection with a roadway. The absence or inadequate condition of DWS was a contributing factor to accessibility barriers in 32.4 percent of all curb ramps. The most common conditions identified with DWS that may impact accessibility are deterioration or damage of the DWS followed by insufficient contrast of the DWS with the sidewalk. Finally, 22 percent of curb ramps are not flush with the asphalt where they meet the road, which can create problems for people with mobility issues.

The PROWAG Guidelines determine a minimum contrast of a light-on-dark or a dark-on-light to be considered accessible. While a DWS that is similar in color but contrasts in shade is compliant, it should be taken into consideration the color surfaces that are easiest for the vision impaired to use when crossing the street.

TABLE 5 CURB RAMP CONDITIONS

TYPE OF BARRIER	COUNT	PERCENTAGE
No Curb Ramp Present	902	24.8%
Curb Ramps with Barriers*	2,265	82.6% (of those with curb ramps)
Not Flush with Asphalt	586	22.0% (of those with curb ramps)
Inadequate Width	180	6.6% (of those with curb ramps)
DWS Absent	887	32.4% (of those with curb ramps)
DWS with Barriers*	233	12.3% (of those with DWS)
Insufficient Width	17	0.9% (of those with DWS)
Insufficient Depth	36	1.9% (of those with DWS)
Insufficient Contrast	142	7.5% (of those with DWS)
Deterioration/Damage	153	8.1% (of those with DWS)

*Curb ramps and DWS strips may have multiple barriers

In addition to conditions that may create barriers to accessibility, curb ramps and DWS were inventoried for characteristics that may assist the City in determining repair costs, replacement methods, and standard practices. Most of the City's curb ramps serve one direction of travel most of the City's DWS are truncated domes.

TABLE 6 CURB RAMP INVENTORY CHARACTERISTICS

CURB RAMP CHARACTERISTIC	COUNT	PERCENTAGE OF CURB RAMPS
Ramp Serves One Directions of Travel	1375	50.2%
Ramp Serves Two Directions of Travel	523	19.1%

TABLE 7 DWS INVENTORY CHARACTERISTICS

DWS INVENTORY CHARACTERISTICS	COUNT	PERCENTAGE OF DWS
DWS Truncated Domes	1,818	96.3%
DWS Pavement Grooves	80	4.2%

2.4 Pedestrian Signals

Pedestrian signals let motorists know that pedestrians have the right of way, and let pedestrians know when it is their turn to cross a roadway. These signals were evaluated for the presence of a push button to request the crossing phase and/or crossing information, the crossing signal method (audio, visual, or both), and wheelchair accessibility (height and distance of the push button from the access route). The most common condition that may create barriers for pedestrian signal accessibility is that most signals have only audio or visual cues indicating safe times to cross. 84.6 percent of the City's pedestrian signals are visual or audible only, with visual only signals being the most common type.

Accessible pedestrian signals (APS) are defined in PROWAG as integrated devices that communicate information about the WALK and DON'T WALK intervals at signalized intersections in non-visual formats (i.e., audible tones and vibrotactile surfaces) to pedestrians who are blind or have low vision. It is recommended that the City adopt an APS policy to guide implementation of new APS as well as upgrades of existing traffic signals with or without pedestrian signals to include APS installation. It was noted that 38 of the 170 pedestrian signals with a single crossing signal method are along State roads and are therefore the responsibility of the State for maintenance and repairs.

TABLE 8 PEDESTRIAN SIGNAL CONDITIONS

TYPE OF BARRIER	COUNT	PERCENTAGE
No Push Button	152	43.1%(of intersections with a signal)
Visual or Audible Only	170	84.6% (of signals with a push button)
Visual Only	168	83.6%(of signals with a push button)
Audible Only	3	1.5%of signals with a push button)
Not Wheelchair Accessible	10	4.5%(of signals with a push button)

2.5 Pedestrian Crossings Accessibility and Condition

Where sidewalks exist, intersections were observed for the presence of a pedestrian access route across the roadway, the condition of the access route, and the condition of marked crossings. All roads and intersections were observed for the presence of a pedestrian access route at both ends of the crossing, the condition of the crossing, whether there is a designated crosswalk, and the condition of the crosswalk. 2,188 points were collected to evaluate the condition and accessibility of crossings. Nearly 70 percent have a complete access route. Fair or poor route condition was a common barrier for crossings with a complete access route. The most common conditions are caused by potholes or significant cracking in the roadway where the pedestrian crossing exists. Additionally, poor condition of crossing markings was identified at 43.4 percent of all marked crossings. While crosswalk markings are not required under PROWAG, the Manual on Uniform Traffic Control Devices (MUTCD) requires solid white lines on crossings that are marked. Marked crossings that contrast with the roadway may also provide a visual indicator of the pedestrian right of way for the visually impaired. It was noted that 7 of the 328 crosswalks with fair or poor conditions are along state roads and therefore repairs will be under the State of New York's jurisdiction.

TABLE 9 PEDESTRIAN CROSSING CONDITIONS

TYPE OF BARRIER	COUNT	PERCENTAGE
Incomplete Access Route	488	28.7%
Fair or Poor Route Condition	661	38.9%(of those with complete access routes)
Cracks/potholes	586	88.7%(of those with poor route condition)
Improper Cross-slope	66	10.0%(of those with poor route condition)
Other	67	10.1%(of those with poor route condition)

Note: curb cuts and crosswalks are evaluated separately. There is no relationship between the number of crossings and curb cuts evaluated due to variability of curb cut presence at crossings.

TABLE 10 CROSSWALK CONDITIONS

CONDITION	COUNT	PERCENTAGE
Fair or Poor Crosswalk Condition	328	43.4% (of those with marked crossings)

2.6 Transit Stop Accessibility

The Capital District Transportation Authority (CDTA) provides transit service to the City. 412 transit stops were assessed for accessibility. Transit stops within 50ft of sidewalks were assessed based on their connectivity to existing sidewalks and the conditions of their boarding and alighting area. A boarding and alighting area is defined in PROWAG as a level and stable surface for boarding vehicles. 22.8% of all stops have boarding and alighting areas with a condition that may create barriers to accessibility. The most common

conditions are obstructed access routes and insufficient depth of the boarding and alighting areas.

TABLE 11 TRANSIT STOP CONDITIONS

TYPE OF BARRIER	COUNT	PERCENTAGE OF ALL STOPS
Boarding and Alighting Areas with Barrier*	94	22.8%
Insufficient Width	9	2.18%
Insufficient Depth	27	6.55%
Non-Accessible Surface Material**	0	0%
Obstructed Access Route	66	16.01%

*Note: Boarding and Alighting Areas may have multiple barriers identified

**Note: Grass or dirt surface

Maps of all field evaluation results are depicted in Figures 1 through 4. Full size maps are available in Appendix B.

3.0 Methods to Removing Barriers – Policies & Priorities

The City of Troy plans to utilize several approaches to removing barriers in the public right-of-way, including notifying a landowner of a deficient condition and requiring action, responding to public complaints, and ensuring the appropriate design and build-out of new construction following the most recent design guidelines. The City of Troy plans to base barrier removal priorities on two factors: location and the accessibility condition of the facility.

3.1 Location Priority

According to the ADA Title II regulations, the transition plan shall give “priority to walkways serving entities covered by the Act, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas” (§ 35.150 Existing Facilities (d)(2)). The City of Troy will also prioritize land uses downtown and within disadvantaged or underserved neighborhoods.

Disadvantaged or underserved neighborhoods were defined for the purposes of this report based on the “Analysis of Impediments to Fair Housing Choice” report completed in April 2022 for the City of Troy. In the report, a composite index score was evaluated for census tracts in the City of Troy. The composite index score was based on median household income, change in median income, percent of minority population, percent of people with disabilities population, percent owner-occupied housing, percent rental units that are considered affordable, and percent of housing units with one or more housing problems. Tracts were given a score of one through fourteen, with the higher

the tract's index score, the better its conditions are relative to the performance indicators. Disadvantaged Neighborhoods for means of prioritization in this report were defined as areas that received index scores of one through six.

Following the Title II regulations, land use and equity considerations, the City of Troy identified its location priority as follows, beginning with the highest priority:

Priority 1: Downtown

Priority 2: Disadvantaged Neighborhoods Index Score Rankings 1-6

Priority 3: Community Centers and all other

- A. Pedestrian facilities and intersections adjacent to community services.
- B. Pedestrian facilities and intersections adjacent to all other areas.

Figure 5 illustrates the priority sidewalk segments regardless of jurisdiction. A full-size figure is presented in Appendix B.

FIGURE 5A CITY OF TROY ADA PRIORITIZATION MAP NORTH

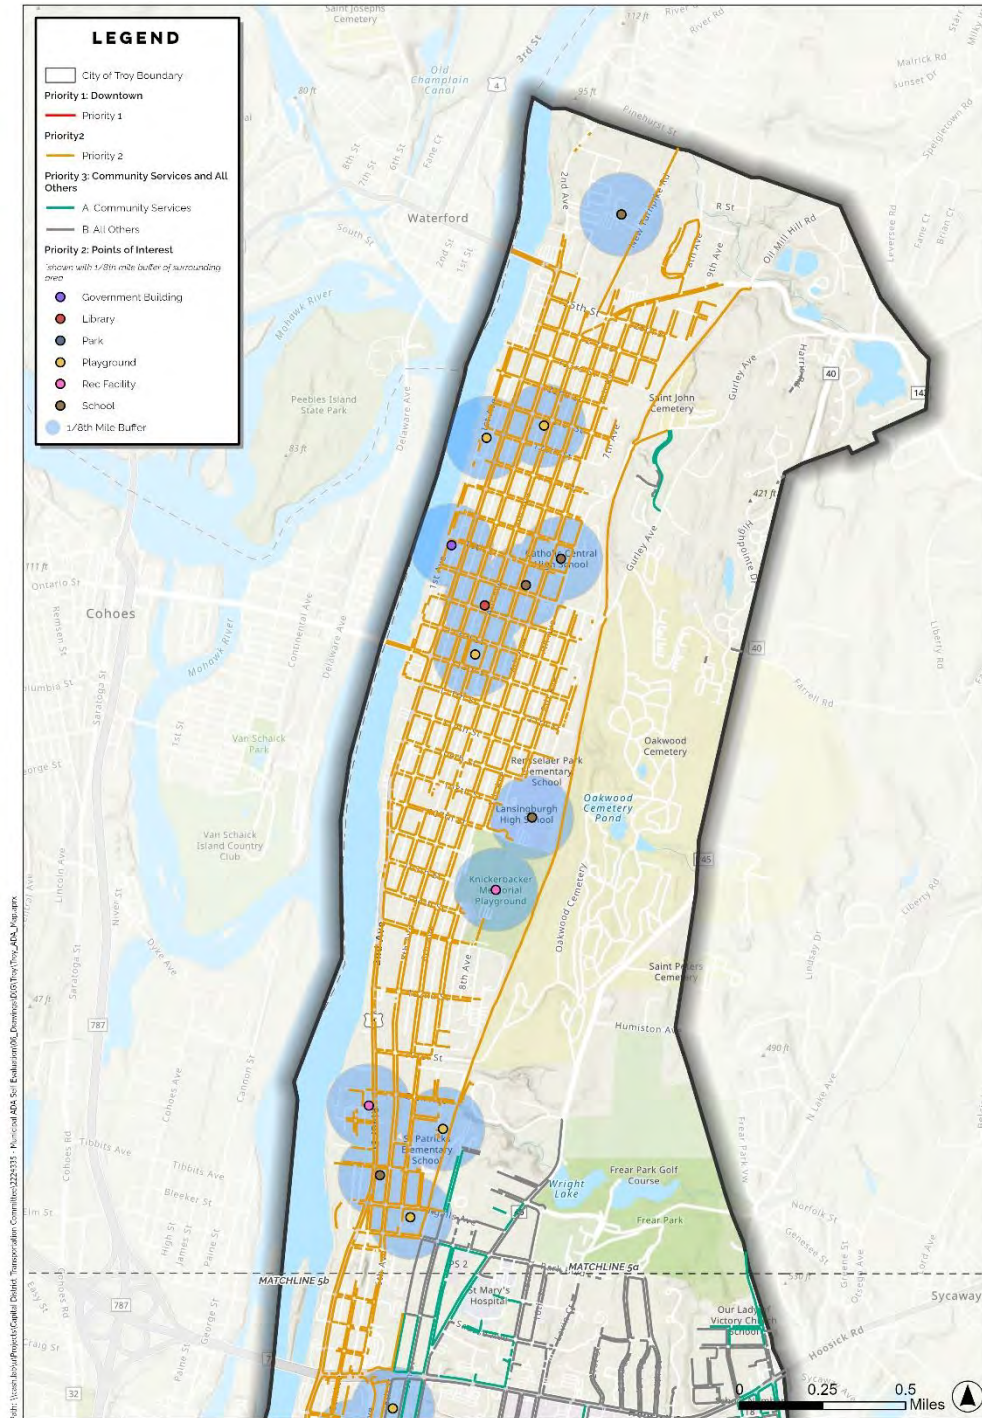

FIGURE 5B CITY OF TROY ADA PRIORITIZATION MAP SOUTH

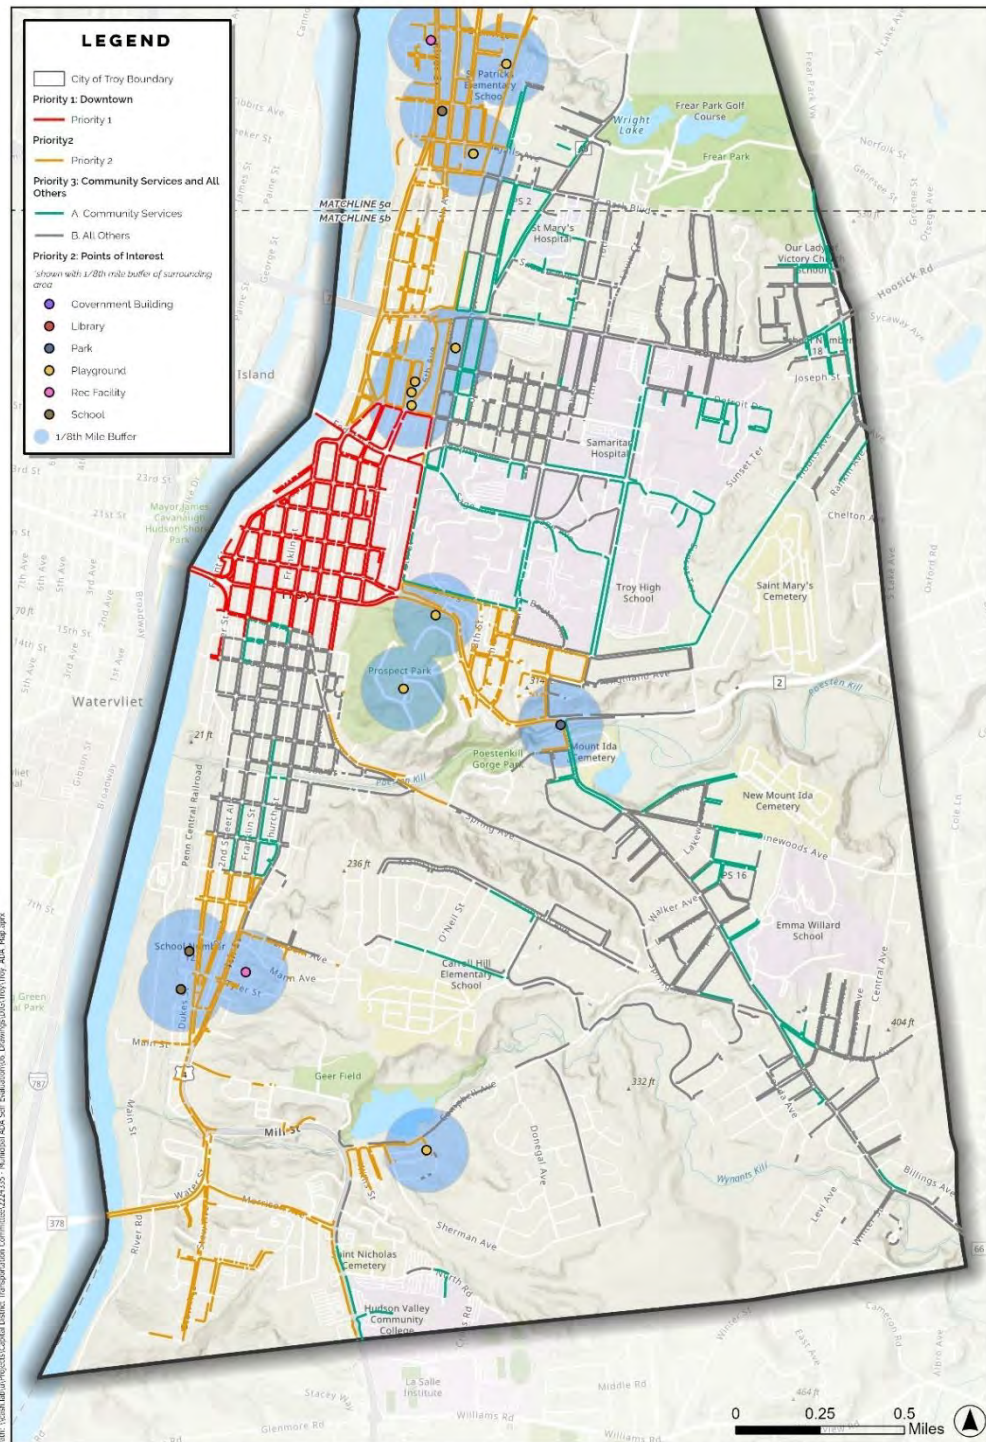

FIGURE 6A CITY OF TROY ROAD MAINTENANCE JURISDICTION NORTH

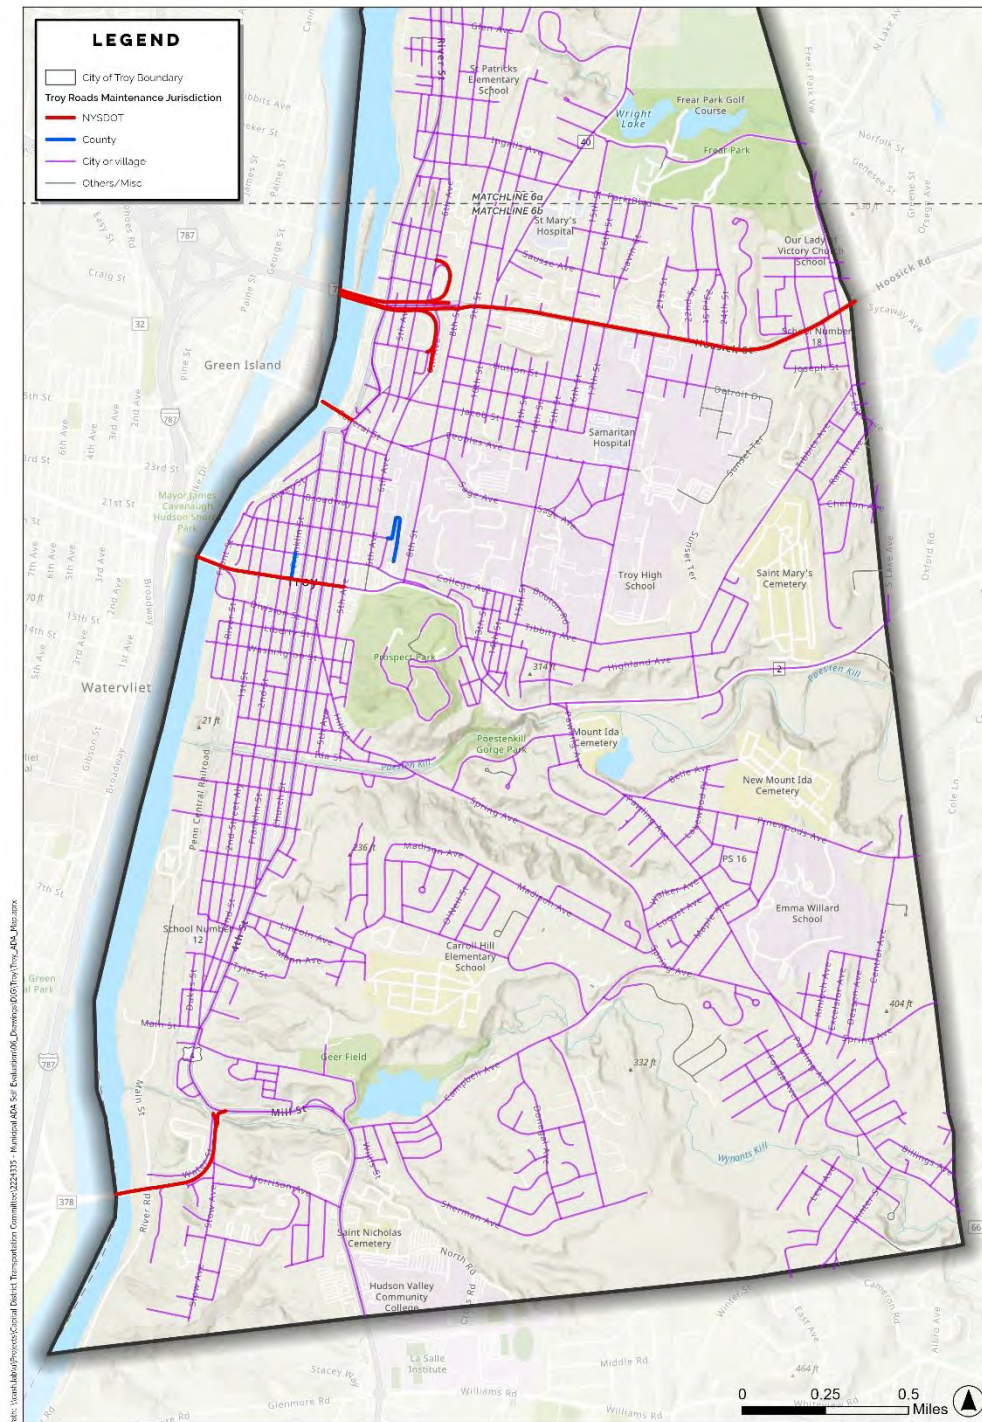

FIGURE 6B CITY OF TROY ROAD MAINTENANCE JURISDICTION SOUTH

3.2 Public Complaint Process

The public complaint process is an integral part of this plan. Public complaints or requests may drive the prioritization of improvements. To file a complaint or a request regarding accessibility of a sidewalk or curb ramp, submit a formal grievance in writing to the Planning Tech designated as the ADA Coordinator located in the City's Planning Department with the location, date, and description of the problem. The ADA Coordinator Within 60 days after the filing of the complaint, an investigation shall be conducted and completed, including, if necessary, a meeting with the complainant to discuss the complaint and possible resolutions. No later than 60 days after submittal a determination shall be issued by the ADA Coordinator in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The determination will explain the position of the City of Troy and offer options for substantive resolution of the complaint.

Appendix F is a copy of the City's public Grievance Procedure under the Americans with Disabilities Act.

3.3 New Construction & Alterations

To ensure the correct design of curb ramps, sidewalks, and crosswalks in new construction and alterations, the City of Troy, through the adoption of this Transition Plan, has adopted the 2011 Public Right of Way Accessibility Guidelines (PROWAG) as finalized in 2023, (herein after known as ADA Guidelines) or the most current regulatory guidelines in the event PROWAG becomes outdated. Once adopted by the US Departments of Justice and

Transportation, these will be the primary regulatory standards that govern the design and construction of all pedestrian facilities. It is important to note that in alteration projects, whenever pedestrian facilities cannot fully meet the standards outlined in the ADA Guidelines, a determination of each structural implacability or technical infeasibility must be thoroughly documented in the permanent project record.

The City of Troy's commitment to ensuring the accessibility of facilities in the public right of way is clearly demonstrated by the Work Plan (Appendix D) and schedule outlined in this report.

The City of Troy requires property owners adjacent to the sidewalk facilities to bear the expense of repair and maintenance responsibility of the pedestrian facility according to the City's General Legislation, § 251-4. The improvements identified in the work plan found in Appendix D of this plan will be the responsibility of the noted landowner. The City has administrative policies and procedures to cause the required remedy of the noted impediments. However, as previously discussed under the Jurisdiction section of this report, if another jurisdiction is undertaking alterations of a roadway, including repaving, that agency is responsible for the replacement of removed pedestrian facilities or for the construction or rehabilitation of a curb ramp to the adjacent sidewalk if an accessible curb ramp does not exist.

As described in NYSDOT's current Transition Plan, NYSDOT undertakes ongoing road maintenance and alterations to ensure accessibility of pedestrian facilities on State owned roads. For the purposes of this Transition Plan, areas lacking the provision of curb ramps in State owned rights-of-way will be identified in this plan as being undertaken by NYSDOT. The improvement of these facilities will correspond to the approved NYSDOT capital improvement

program.

Nothing contained in this work plan would in any way prevent the City of Troy from modifying the implementation schedule.

3.4 Cost & Schedule

The detailed evaluation of the City of Troy's sidewalk network identified a total of 93.76 miles of sidewalk segments rated Partially Accessible (31.44 miles) or Not Accessible (62.32 miles) which will require repair or replacement of barriers to bring them to compliance. For the purpose of estimating construction costs, it was assumed that 30% of the Not Accessible segment panels will require replacement and 15% of the Partially Accessible segment panels will require replacement.

The cost of the repairs and replacement was estimated utilizing the NYSDOT Quick Estimator Reference. This estimate is provided as Appendix C and is summarized as follows: Utilizing the scoring of facilities provided, sidewalk replacement totals \$9.1 Million (M), Curb Ramps \$6.7 M, Pedestrian Signals \$1.2 M, and Crosswalks \$0.5 M. It should be noted that the actual costs will vary depending on the extent of repairs, actual site conditions and the date of construction.

Utilizing the prioritization method detailed above, the City will provide notice of needs of sidewalk repair, starting with highest priority areas, to adjacent landowners and provide them a deadline of 90 days to have the work performed. If the landowner fails to make the required remedy, the City may choose to complete the work.

The City of Troy has set a goal of bringing 4.25 miles of these segments to compliance each year, which will bring the City to compliance in approximately

20 years. As identified during the location prioritization process, pedestrian facilities in the public right of way adjacent to downtown, disadvantaged neighborhoods, and community services will be prioritized before facilities serving other areas. Curb ramps, crossings, and pedestrian signals will be addressed with their corresponding sidewalk segments or during road paving and resurfacing projects.

As opportunity allows, the City will make efforts to collaborate with stakeholders to improve the ADA accessibility of pedestrian facilities in the public right-of-way. Compliance is required to the extent feasible within the scope of the project. There will be times when it is technically infeasible to provide full compliance with the guidelines for example, if clear space at the top of the ramp is obstructed by a building or the slope of a hill is so extreme as to prevent a reasonable slope for a ramp in both directions. The inventory process may not account for such situations and could show a high-priority rating when all practical actions have been taken.

4.0 Monitoring & Updates

4.1 Transition Plan Management

As with any effective planning document, the City of Troy's Transition Plan will require continued review and updating. It is recommended that the City review and update this document on a five-year cycle. However, this does not preclude the City from altering that five-year cycle. If new regulations are adopted or new information is available that does not alter the intent of the transition plan, the City intends to add appendices to the document reflecting those changes.

Members of the public that wish to see changes made to the plan are encouraged to submit their comments and concerns, in writing, to the ADA Coordinator to consider including during the next update.

In addition, the City will document progress made annually, for public review and comment. Members of the public that wish to see changes made to the plan are encouraged to submit their comments and concerns, in writing, to the ADA Coordinator to consider including during the next update.

4.2 Coordination with Public Improvements and Capital Expansion

The City has identified a schedule for improvement to non-compliant facilities (Appendix D). However, the City should take advantage of regular capital improvement projects or private development to upgrade deficient facilities, if occurring adjacent to those facilities.

The City will coordinate with the New York State Department of Transportation (NYSDOT) capital improvement schedule to replace or upgrade non-compliant curb ramps and sidewalks along State highways. Likewise, the City will coordinate with Rensselaer County to replace or upgrade non-compliant curb ramps and sidewalks along County roads.

5.0 Public Input

The City of Troy provided opportunities for individuals to comment and provide input on this Transition Plan, which includes:

- Early results of the field assessment and prioritization framework were presented to the City's Advisory Committee for feedback.
- A survey on a preferred prioritization method of removing barriers was made public to the community and received 73 responses. A summary of the survey results is below.
- The plan was presented to the City of Troy Common Council on February 22, 2024, and council members were encouraged to provide feedback on behalf of their constituents.
- Copies of the draft Plan were made available for public review and comment at City Hall, and the library.
- The ADA Transition Plan has also been made available on the City's website at [Local Laws, Plans & Charter | Troy, NY \(troyny.gov\)](https://troyny.gov/local-laws-plans-charter); and
- The City of Troy opened a public comment period from *March 27th, 2024* to *April 26th, 2024*. Members of the public were encouraged to provide feedback by calling and/or emailing City staff to log their comments.

5.1 Comments Received

1. Have a consistent font- the draft shows different font used; some are not ADA compliance. E.g. Raleway font used in the draft plan is not ADA accessible.

Thank you for your comment. The plan has been updated with different body font.

2. Consider image description text so that people who use screen readers don't miss that information on the map.

Thank you for your comment. The plan has been updated to show alternative text corresponding with images and maps.

3. The draft plan omits a large part of the city, concentrating mostly on the western half of the city. Much of the omitted area completely lacks sidewalks, ADA compliant or otherwise. Any chance to remedy that lack?

Thank you for your comment. The entirety of the City of Troy's existing pedestrian infrastructure in the public right-of-way was assessed for compliance with the Americans with Disabilities act based on the design standards in the Public Rights-of-Way Accessibility Guidelines. As such, the funding and scope of this project is solely focused on the compliance of existing infrastructure and does not include recommendations for new sidewalks.

4. Prioritize existing crosswalks pavement maintenance to ensure safe crossing of street. Typically, when streets are milled and paved after installation of intersection curb ramps, the side streets are not repaved,

Thank you for your comment. Improvements to pedestrian infrastructure will be prioritized using a method which takes into consideration safety, equity, location and ADA Title II regulations which identify that transition plans shall give "priority to walkways serving entities covered by the Act, including *State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas*" (§ 35.150 Existing Facilities (d)(2))."

5. Stripe more crosswalks citywide, particularly over local pedestrian traffic generators

Thank you for your comment. As outlined in Appendix D, the Work Plan and Data Inventory, improvements to existing crosswalks will be completed in accordance to the prioritization method outlined in this plan to remove identified barriers to accessibility. The funding and scope of this project is solely focused on the compliance of existing infrastructure and does not include recommendations for new crosswalks.

6. Identify major pedestrians' generators

Thank you for your comment. Improvements to pedestrian infrastructure will be prioritized using a method which takes into consideration safety, equity, location and ADA Title II regulations which identify that transition plans shall

give “priority to walkways serving entities covered by the Act, including *State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas*” (§ 35.150 Existing Facilities (d)(2)).” As noted above, the City of Troy intends to use a prioritization method focused first on the downtown area, then disadvantaged neighborhoods, followed by community centers and services. This is intended to systematically address concerns in all areas frequented by pedestrians.

7. Safe routes to schools – are they planned?

Thank you for your comment. The entirety of the City of Troy’s existing pedestrian infrastructure in the public right-of-way was assessed for compliance with the Americans with Disabilities act based on the proposed design standards in the Public Rights-of-Way Accessibility Guidelines. The funding and scope of this project is solely focused on the compliance of existing infrastructure and does not include recommendations for new sidewalks or comment on planned routes.

Copy of submitted public comments are available in Appendix H.

5.2 Public Survey Results Summary

Respondents ordered eight options from 1-8, with one being their first priority for repairs and 8 being their lowest priority of repairs. The eight options were downtown, government facilities, commercial areas, healthcare facilities, schools, community centers/parks, public transportation/transit stops, and locations within disadvantaged or underserved neighborhoods. 73 respondents ranked these choices.

The option most frequently chosen as the number one priority was downtown, with 26 people selecting it as priority number one. The least frequently chosen option for number one priority was commercial areas, with zero people selecting it. 16 people each chose healthcare facilities and locations with

disadvantaged or underserved neighborhoods for their number one priority. The option most frequently chosen as the lowest priority, number eight, was Government facilities with 16 people selecting it.

The top three areas that respondents believe should be the number one priority for repairs were downtown, healthcare facilities, and locations within disadvantaged or underserved neighborhoods.

In considering the top rankings, analysis was also conducted on the most frequently chosen options for priorities one, two and three. Over half of the respondents, 43, selected healthcare facilities as either priority one, two or three. 34 respondents chose downtown as either priority one, two or three. 33 respondents each chose public transportation, or schools as priority number one, two, or three. This indicates that these are the most pressing priorities according to respondents.

In considering the lowest rankings, analysis was conducted on the most frequently chosen options for priorities six, seven, and eight. Over half of the respondents, 45, chose commercial areas as either priority six, seven, or eight. 42 respondents chose community centers, and 39 chose government facilities. This indicates that these three areas are the lowest priorities according to respondents.

Survey results are available in Appendix I

APPENDIX A.1: PEDESTRIAN ACCESS ROUTE

Pedestrian Access Routes (PAR) are walkways, or paths, for people to travel. The path must be a continuous width of at least 4ft. wide. If the clear width of the path is less than 5ft, then there must be a section that is at least 5ft at a maximum of every 200ft. This is referred to as a "Passing Space". The Surface of the path needs to be firm, stable, and slip resistant. Examples of commonly used materials are concrete, asphalt, and brick.

<p><i>Pedestrian Access Route/Pathway</i></p>	 <p>The diagram illustrates a cross-section of a pedestrian access route. On the left, a horizontal line is labeled 'Curb'. Below the curb, a shaded gray area represents the pathway. A vertical dimension line indicates a width of '4 ft.' for the initial section. Further along, another vertical dimension line indicates a width of '5 ft.' for a section labeled 'Passing space'. A horizontal dimension line below the pathway indicates a distance of '200 ft.' between the start of the 4 ft section and the start of the 5 ft passing space section.</p>
<p><i>Grate in Pathway:</i></p> <p>If a grate is incorporated into a pathway, the holes in the grate should be no larger than ½ inch in diameter.</p>	 <p>The photograph shows a square metal grate set into a gravel surface. Annotations include: '1/2" Max' with a vertical arrow pointing to the height of the grate's openings; 'Long Opening' with a horizontal double-headed arrow pointing to the length of the rectangular openings; and 'Pedestrian Travel' with a white arrow pointing upwards through the center of the grate.</p>

APPENDIX A.2: PAR AT CROSSINGS

When crossing an intersection, the pathway does NOT need to have a crosswalk visibly marked. It only requires a curb ramp on both sides of the street. If there is a cross walk, it should be maintained as explained in Appendix B.1 and B.2. When crossing over train tracks, the gap between the rails and crossing surface should be no wider than 2.5in. for commercial trains, and 3in for freight trains.

Street Crossings:

While often marked, it is not required. The location of a curb ramp on both sides' makes a complete pedestrian access route. If there is a curb ramp on one side and not the other, then the path is considered inaccessible.

Railroad Crossing:

When crossing over train tracks, the gaps are left for the train to be able to roll through. The tracks are to be at the same height as the crossing made available.

APPENDIX A.3: CURB RAMPS

There are many different types of curb ramps that can be used for different types of intersections.

Additionally, curb ramp options shown below can be incorporated into a design as an alternate approach to traditional curb ramps.

Pedestrian Refuge Island:

An area within an intersection where people wait for a break in traffic to safely cross the remainder of the intersection. Curb ramps in refuge islands must meet all the accessibility criteria of curb ramps not in refuge islands.

Curb Extension:

Curb extensions, also known as bulb-outs or bump outs, provide a clear view of oncoming traffic prior to leaving the sidewalk. Curb ramps on curb extensions must meet all accessibility criteria of curb ramps not on extensions.

APPENDIX A.4: DETECTABLE WARNING SURFACE (DWS) TYPE

Truncated Domes: Elevated, bubble-like domes on the surface of the DWS. The domes should have an approximate height of 0.2 (1/5th) inches. The domes should face the same direction as the sidewalk.

Pavement Grooves: Grooves cut into the existing concrete, facing the same direction as the sidewalk. Pavement grooves are common but are not recognized as an acceptable DWS type because they do not provide a visual contrast between the pavement and ramp.

Truncated domes

Pavement grooves

APPENDIX A.5: DETECTABLE WARNING SURFACE (DWS) WIDTH, DEPTH, PLACEMENT, AND DETERIORATION

Width: The DWS should extend the full width of the curb ramp or sidewalk. The minimum width is 4 feet (48 inches).

Design Guideline

Example

Depth: The DWS should be a minimum of 2 feet (24 inches) deep, in the direction of travel.

(a) perpendicular curb ramp with sloped edges

(b) perpendicular with rounded curb ramp

(c) parallel with curb ramp

Placement: The DWS should face the same direction as the sidewalk unless the curb ramp serves two or more directions of crossing. Refer to the images below for the appropriate curb ramp.

Perpendicular curb ramp

(Angled ramps are only acceptable when serving two directions at once. There must be a ramp a person can access in both directions.)

Parallel curb ramp

Blended transition

Deterioration: The DWS should be extruding from the surface so that visually impaired individuals will feel the strip.

**DWS IS NOT
SIGNIFICANTLY
DETERIORATED**

**DWS IS SIGNIFICANTLY
DETERIORATED**

APPENDIX A.6: CONTRASTING DWS COLOR

- The color should contrast from the sidewalk, it should at least be light-on-dark or dark-on-light.
- Best practices is to install a yellow DWS (as seen on bottom left image) as it is the most visible for the vision impaired, darker colors often appear as missing gaps in the sidewalk.

DWS COLOR CONTRASTS FROM CURB RAMP	DWS COLOR DOES NOT CONTRAST FROM CURB RAMP
  	 

APPENDIX A.7: TYPE OF PEDESTRIAN SIGNAL

Pedestrian Sign – Not pedestrian activated: A sign marked for pedestrian crossing without a button to press. It may or may not have flashing lights.

Pedestrian Signal – Pedestrian activated: A button pushed by the pedestrian, which activates a crossing signal. It may or may not have a flashing light.

Features of the pedestrian crossing buttons:

Visual: Flashing lights, large/bold fonts and arrows are used.

Audible: Locating tones, or beeps, are emitted from the signal post to guide someone to the button. Alternatively, when pressed the signal will speak, communicating to the pedestrian when it is safe to cross.

Both: When a signal button uses both auditory and visual cues to aid a pedestrian in crossing the street. This includes any combination of visually high contrast signage, flashing lights/signals, or audible tones/speech.

APPENDIX A.8: PEDESTRIAN SIGNAL COMPLIANCE

When the pedestrian signal includes a button, the button should be mounted within 15 inches to 48 inches (4 feet) above the ground. The button should be accessible with a maximum of a 10 inches side reach.

Accessible Pedestrian Pushbuttons

Reach Ranges

- ☐ 48" max. above the ground
- ☐ 15" min. above the ground
- ☐ Side reach within 10"

APPENDIX B.1: CROSSWALK MATERIAL

Crosswalk markings should be smooth and even with the road surface. The material of the crosswalk may differ from the typical pavement striping for aesthetic purposes. Common materials used, other than paint, are brick pavers, stamped concrete, or asphalt.

Painted

Brick Pavers

Stamped Concrete

Asphalt

APPENDIX B.2: CROSSWALK RATING

Rating	Condition	Reference Images
Poor	Crosswalk is heavily faded, completely faded, or missing sections.	
Fair	Crosswalk is fading but still visible.	
Good	Crosswalk is in like-new condition with minor cracks.	
Excellent	Crosswalk is new with no cracks or faults.	

APPENDIX C.1: SIDEWALK DEFECTS

Missing Panels

Heaving Panels

Obstructions

Too Narrow

APPENDIX C.2: SIDEWALK SEGMENT RATING

Rating	Condition	Reference Images
Fully Accessible	<ul style="list-style-type: none"> Sidewalk is new or in like-new condition. Sidewalk is level, no cracks, no faults, no obstructions, and adequate width. Sidewalk is at least 4 feet (48 inches) wide. 	
Mostly Accessible	<ul style="list-style-type: none"> Sidewalk is in almost new or good condition. Sidewalk is level and may have minor cracks. Sidewalk is at least 4 feet (48 inches) wide. 	

<p>Partially Accessible</p>	<ul style="list-style-type: none"> • Small patches of broken or chipped sidewalk, and a small buildup of dirt/debris, vegetation growing between panels or cracks. • Sidewalk may have small vertical faults larger than ½ inch but could potentially be grind down/repaired. • Large cracks are present. • Sidewalk is less than 4 feet wide. 	
<p>Not Accessible</p>	<ul style="list-style-type: none"> • Sidewalk may have serious accumulation of dirt/debris, establishment of vegetation or other obstructions. • Sidewalk is uneven from faulting (greater than ½ inch) that cannot be grind down/repaired and will require replacement. • Sidewalk is less than 4 feet wide. 	

APPENDIX D: TRANSIT STOPS

Accessible transit stops require 5 feet (60 inch) wide and 8 feet (96 inch) deep boarding area.

APPENDIX C: COST ESTIMATES

Unit cost estimates are established using replacement costs from the NYSDOT Quick Estimator Reference – Upstate. Unit cost estimates are used in conjunction with field data to estimate repair costs. Note that specific costs may vary due to site conditions that may require relocating utilities/mailboxes; alteration of drainage structures; driveway aprons; acquiring right-of-way; pruning/clearing & grubbing; planting. Typical sidewalk replacement costs (2023) are observed at \$13 to \$15 per square foot, or \$65 to \$75 per linear foot (LF), for the purpose of budgeting in this report \$75 is recommended to assess cost. Additionally, based on jurisdiction outlined in Table 1 of this report, *Responsible Entity for Maintenance of Pedestrian Facilities*, costs of repairs for curb ramps, pedestrian signals, and crosswalks below only include right of ways under the jurisdiction and responsibility of the City.

Table 1 Unit Cost Estimates

Facility	Cost
Concrete Sidewalk (4" thick, 5' wide)	\$75/linear foot
ADA Curb Ramp	\$6,300
LS Type Ladder Crosswalk (700ft Typical)	\$1,400
Pedestrian Signal	\$8,200

Table 2 City of Troy ADA Compliance Estimated Costs

Sidewalks Estimated Cost for Compliance (Obstructions Excluded):		
Partially Accessible (163,551 ft)*	\$	1,839,954.94
Not Accessible (324,002 ft)**	\$	7,290,046.58
Total Non-ADA Compliant Segments (487,554 ft)	\$	9,130,001.51
*Assumed 15% of panels in need of replacement **Assumed 30% of panels in need of replacement		
Curb Ramps and Signals Estimated Costs for Compliance:		
Curb Ramps*	\$	6,703,200.00
Pedestrian Signals**	\$	1,164,400.00
Total Intersections:	\$	7,867,600.00
*Excludes "Not Flush with Asphalt" **Does not include "No push button" signals		
Crosswalks Estimated Costs for Compliance:		
Total Crosswalks*		\$449,400
*Assumed incomplete access route is addressed in curb cut replacements		
Total Capital Investment	\$	17,447,001.51

APPENDIX D: WORK PLAN AND DATA INVENTORY

The City of Troy is committed to ensuring facilities in the public right of way are accessible for everyone, including people with disabilities. The City will prioritize:

Priority 1: Downtown

Priority 2: Disadvantaged Neighborhoods Index Score Rankings 1-6

Priority 2: Community Centers and all other

- A. Pedestrian facilities and intersections adjacent to community services.
- B. Pedestrian facilities and intersections adjacent to all other areas.

The facilities that are prioritized first are most likely to be frequented by residents and visitors and are essential for the City's continued operation and success. A map of all sidewalk segments by priority ranking is in Appendix B.

The "Sidewalk Segments Priority Areas" table within this appendix will be used to identify sidewalk segments eligible for repair/replacement based on their priority ranking. Sidewalk segments will then be cross referenced with field analysis results to determine specific barriers to accessibility and the repair/replacement needs for all facilities associated with the segment (a guide to using the field analysis results is included within this appendix). The City will then work to remove barriers to accessibility until each segment is brought to compliance, beginning with the highest priority (1A), and ending with the lowest priority (3). For example, sidewalk segments ranked in priority category 1A will be first to be repaired/replaced, followed by segments ranked in category 1B and so on. The same process will be used to bring intersections, and crossings, to compliance using the corresponding tables within this appendix. Pedestrian signals will be addressed as the City determines it is appropriate to do so to avoid site disturbances due to electrical connection requirements.

The City may deviate from this framework to take advantage of regular capital improvement projects or private development to upgrade deficient facilities, if occurring adjacent to those facilities. For example: a low priority that is rated "not accessible" may be brought to compliance in conjunction with an adjacent road resurfacing project before the City has finished bringing higher priority segments to compliance.

As previously discussed under the *Jurisdiction* section of this report, if another jurisdiction is undertaking alterations of a roadway, that agency is responsible for the replacement of removed pedestrian facilities or for the construction of a curb ramp to the adjacent sidewalk if one does not exist. The NYS Department of Transportation (NYSDOT) has completed a Transition Plan including sidewalks along state roadways and undertakes on-going road maintenance and alterations. For the purposes of this Transition Plan, areas lacking the

provision of curb ramps in state rights-of-way will be identified in this plan as being undertaken by NYSDOT. The improvement of these facilities will correspond to the approved NYSDOT capital improvement program.

The table below is intended to be used as an identification tool for existing barriers and is therefore inclusive of all sidewalk segments in need of improvement, regardless of jurisdiction. For those sections falling along County or State Roads, the City will coordinate with NYSDOT or the responsible entity to address repairs.

APPENDIX E: ADA POLICY STATEMENT

NOTICE UNDER THE AMERICANS WITH DISABILITIES ACT

In accordance with the requirements of title II of the Americans with Disabilities Act of 1990 ("ADA"), the City of Troy will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

Employment: The City of Troy does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under title I of the ADA.

Effective Communication: The City of Troy will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in the City of Troy's programs, services, and activities, including qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

Modifications to Policies and Procedures: The City of Troy will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. For example, individuals with service animals are welcomed in the City of Troy offices, even where pets are generally prohibited.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of the City of Troy, should contact the **ADA Coordinator** Troy City Hall, 433 River Street, Troy, NY 12180, 518-279-7155, as soon as possible but preferably no later than 48 hours before the scheduled event. Requests later than 48 hours, will be accommodated to the extent possible.

The ADA does not require the City of Troy to take any action that would fundamentally alter the nature of its programs or services or impose an undue financial or administrative burden.

Complaints that a program, service, or activity of the City of Troy is not accessible to persons with disabilities should be directed to the **ADA Coordinator** Troy City Hall, 433 River Street, Troy, NY 12180, 518-279-7155.

The City of Troy will not place a surcharge on a particular individual with a disability or any

group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs

APPENDIX F: GRIEVANCE PROCEDURE

CITY OF TROY GRIEVANCE PROCEDURE UNDER THE AMERICANS WITH DISABILITIES ACT

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City of Troy. The City of Troy's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or their designee as soon as possible but no later than 60 calendar days after the alleged violation to:

City of Troy
City Hall
433 River Street
Troy, NY 12180

Within 60 days after the filing of the complaint, an investigation shall be conducted and completed, including, if necessary, a meeting with the complainant to discuss the complaint and possible resolutions. No later than 60 days a determination shall be issued by the ADA Coordinator or their designee in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The determination will explain the position of the City of Troy and offer options for substantive resolution of the complaint.

If the determination by the ADA Coordinator or their designee does not satisfactorily resolve the issue, the complainant and/or his/her/their designee may appeal the decision within 30 calendar days after receipt of the response to the City's Commissioner of Administrative Services or their designee.

The City's Commissioner of Administrative Services or their designee will review the complaint and, if necessary, meet with the complainant to discuss the complaint and possible resolutions. Within 60 calendar days after receipt of the appeal, the City's Commissioner of Administrative Services or his/her designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the ADA Coordinator or their designee, appeals to the City's Commissioner of Administrative Services or their designee, and responses from these two offices will be retained by the City of Troy for at least three (3) years.

APPENDIX G: ADA COORDINATOR

CITY OF TROY ADA COORDINATOR

All complaints and/or questions regarding accessibility of any public buildings or pedestrian facilities within the right-of-way of the City of Troy should be directed to designated official below.

Title: Planning Tech

Telephone: 518-279-7155

Mailing Address:

City of Troy

City Hall

433 River Street

Troy, NY 12180

APPENDIX H: PUBLIC COMMENT

ADA Transition Plan Comments

1. "Have a consistent font- the draft shows different font used; some are not ADA compliance. E.g. Raleway font used in the draft plan may not be ADA accessible."
Charles Doyle
2. "Consider image description text so that people who use screen readers don't miss that information on the map." Charles Doyle
3. "The draft plan omits a large part of the city, concentrating mostly on the western half of the city. Much of the omitted area completely lacks sidewalks, ADA compliant or otherwise. Any chance to remedy that lack?" Jill Nagy
4. "Prioritize existing crosswalks pavement maintenance to ensure safe crossing of street. Typically, when streets are milled and paved after installation of intersection curb ramps, the side streets are not repaved." Viestarts Zubkovs.
5. "Stripe more crosswalks citywide, particularly over local pedestrian traffic generators." Viestarts Zubkovs.
6. "Identify major pedestrians' generators." Viestarts Zubkovs.
7. "Safe routes to schools- are they planned?" Viestarts Zubkovs.

APPENDIX I: SURVEY RESULTS

Q1: Which sidewalks (and related facilities) should be repaired first?

Respondents ordered eight options from 1-8, with one being their first priority for repairs and 8 being their lowest priority of repairs. The eight options were downtown, government facilities, commercial areas, healthcare facilities, schools, community centers/parks, public transportation/transit stops, and locations within disadvantaged or underserved neighborhoods. 73 respondents ranked these choices.

The option most frequently chosen as the number one priority was downtown, with 26 people selecting it as priority number one. The least frequently chosen option for number one priority was commercial areas, with zero people selecting it. 16 people each chose healthcare facilities and locations with disadvantaged or underserved neighborhoods for their number one priority. The option most frequently chosen as the lowest priority, number eight, was Government facilities with 16 people selecting it.

The top three areas that respondents believe should be the number one priority for repairs were downtown, healthcare facilities, and locations within disadvantaged or underserved neighborhoods.

In considering the top rankings, analysis was also conducted on the most frequently chosen options for priorities one, two and three. Over half of the respondents, 43, selected healthcare facilities as either priority one, two or three. 34 respondents chose downtown as either priority one, two or three. 33 respondents each chose public transportation, or schools as priority number one, two, or three. This indicates that these are the most pressing priorities according to respondents.

In considering the lowest rankings, analysis was conducted on the most frequently chosen options for priorities six, seven, and eight. Over half of the respondents, 45, chose commercial

areas as either priority six, seven, or eight. 42 respondents chose community centers, and 39 chose government facilities. This indicates that these three areas are the lowest priorities according to respondents.

Top three selections for each priority level (option and number of respondent choices):

Priority 1	Priority 2	Priority 3	Priority 4	Priority 5	Priority 6	Priority 7	Priority 8
Downtown (26)	Transit (14)	Schools (15)	Health (14)	Transit (12)	Commercial (16)	Community (17)	Government (15)
Health (16)	Health (14)	Health (13)	Schools (14)	Schools (11)	Community (13)	Commercial (16)	Commercial (13)
Disadvantaged (16)	Schools (13)	Transit (11)	Community (10)	Disadvantaged (11)	Government (13)	Government (11)	Community (12)

Finally, in considering all rankings, analysis was also done by accumulating all of the scores given to each option by respondents. This was done by multiplying the ranking number (1-8) by the number of respondents who ranked an option at that level. The intention of this analysis was to find the lowest total score of the priorities to indicate the top priorities of respondents. In terms of overall scoring, healthcare facilities were ranked highest in terms of overall priorities. Second was downtown, third was disadvantaged neighborhoods, followed closely by public transportation and schools. The lowest priority areas were again, government facilities, commercial areas, and, finally, community centers.

Overall Score Priorities:

1. Healthcare Facilities
2. Downtown
3. Schools
4. Public Transportation/Transit Stops
5. Disadvantaged/Underserved Neighborhoods
6. Government Facilities
7. Commercial Areas
8. Community Centers

Question 2: Are there other sidewalks, and related facilities, you believe should take repair priority?

Respondents were asked to list any other locations or facilities they believe should take repair priority in the community. Many listed specific street names in the community that have limited accessibility. Others reiterated the need to address healthcare facilities, hospitals, doctor's offices, and downtown. Others contrarily noted that many services reach downtown first already, and other areas should be prioritized. New areas suggested included the YMCA, the farmers market, bus stops, libraries, historic areas, playgrounds, neighborhoods, the side

streets around RPI, and areas where chair users, visually impaired people, or other people with mobility-related disabilities live.

Question 3: Do you have a disability or other condition that impacts your ability to use the sidewalk network?

40 percent of respondents identified themselves as having a disability or other condition that impacts their ability to use the sidewalk network.

Question 4: What is the zip code of where you reside?

Most respondents reside in the 12180-zip code. Other respondent zip codes included 12182, 12144, 12188, 12303, 12307, 12181, 12481, 12054, 12065, 12047, 12186.
